

REMARKS

Claims 17-22 are the only claims sought to be prosecuted in this divisional application.

The title has been amended to reflect that only the method claims are presented in this application. The specification has been amended to state that the instant application is a divisional of the parent case. Applicant, through the undersigned, represents that to the best of its knowledge and belief, no new matter has been introduced by these amendments to the specification.

The formal drawings from the parent case, which were found acceptable to both the Examiner and the Official Draftsperson in the parent case, have not been changed in any way and are resubmitted in this Divisional Application.

Therefore, Applicant respectfully submits that this divisional application, with these amendments, is now in condition for allowance.

Respectfully submitted,

Kent N. Stone
